AGGRESSIVE CAMPAIGN WAGED.

Fully one hundred farmers joined the dark tobacco growers' association in McCracken county yesterday at Massac, the result of a big barbecue and public speaking by two wel known speakers from Kentucky and Tennessee, Captain W. J. Stone, of Kuttawa, and Mr. Thomas Glover, of Springfield, Tenn., were the speakers, and made forceful talks.

"There were fully 100 farmers at the speaking, and many outsiders who came to attend the barbecue and through curiosity." stated Captain. Stone at the depot this morning. "After the speaking we enlisted membership, and when the meeting broke up and we left, there was not a tobacce grower who attended who did not join the association.'

Speakings have been arranged for Marshall county, and will begin this month. Speakings all over the dark patch where organization is not solid, will be features, of the association work until organization next month for arrangement of a schedule of

Only Seven Left.

Salesman Gus Veal, of the dark tobacco growers' local station, had only seven hogsheads of tobacco left over after the season closed here and he will sell them at private sale. It was a clean sweep made by the local sales station, and indications points to a sale of many more hogsheads next season.

COPPER PRICE DROPS:

TELEPHONE EXTENSION ON. Extension and improvement work that has been held up by the two local telephone companies, due to the extraordinary high price of copper, will probably be resumed again and the local offices are awiting advices to proceed. Copper has slumped considerable in the last few weeks and is down now from 28 cents to 18, which is quite an item. Work all over the country was being held up on account of the high price, and the extension of rural telephone lines, no doubt, will soon resume.

The Outlook for Fall

An Optimistic View of the Clothing Trade

-we begin the autumn season with pleasurable anticipation and no misgivings. The country is solidly prosperous, wages are high and the people happy. We are gnaranteed a continuance of prosperity and nowhere on the horizon are there any indications of squalls. Acting upon these conditions and beliefs, we have laid in the largest stock of merchandise in our career and it comes from the best houses in the world. Naturally there has been improvement in methods and consequent improvement in quality, so that every branch of this institution is correspondingly better than it was last year. This is due to the unfailing American progress which never sleeps or halts and if you will trouble yourselves to call and examine the new display, you will secure ample evidence of the truth of these assertions.

-Fall Suits and overcoats are smarter-they are more graceful-bear more material and more tailoring. They show the result of "striving to be best." The price range is

AND WE CAN **PROVE IT**

Beautiful Hair At Small Cost.

WITHIN the last decade great and rapid strides have been made in W Materia Medica. Many diseases that were considered incurable fifteen years ago are now cured in a few days, and in many cases prevented altogether. The scientists of late years have been delving for the cause, the foundation, the reason and the starting point of disease, fully realizing that the actual and true cause must be ascertained before the remedy can be located. Hair troubles, like many other diseases, have been wrongly diagnosed and altogether misunderstood. The hair itself is not the thing to be treated, for the reason that it is simply a product of the scalp, and wholly dependent upon its action. The scalp is the very soil in which the hair is produced, nurtured and grown, and it alone should receive the attention if results are to be expected. It would do no earthly good to treat the stem of a plant with a view of making it grow and become more beautiful-the soil in which the plant grows must be attended to. Therefore, the scalp in which the hair grows must receive the attention if you are to expect it to grow and become more beautiful.

Loss of hair is caused by the scalp drying up, or losing supply of moisture or nutriment, and when baldness occurs the scalp has simply lost all of its nourishment, leaving nothing for the hair to feed upon (a plant or even a tree would die under similar conditions).

The natural and logical thing to do in either case is, feed and replenish the soil or scalp as the case may be, and your crop will grow and multiply as nature intended

Dr. Knowlton's DANDERINE

is the only remedy for the hair ever discovered that is identical with the natural hair foods or liquids of the scalp. It feeds and nourishes the hair and does all the work originally carried on by the natural nutrients or life-giving juices generated by the scalp itself. It penetrates the pores of the scalp quickly and the hair soon shows the effects of its wonderfully exhilarating and lifeproducing qualities.

One twenty-five-cent bottle is enough to convince you of its great worth as a hair growing and hair beautifying remedy-try it and see for yourself. Now on sale at every drug and toilet store in the land. Three sizes, 25c, 5oc and \$1.00.
